

## **INDUSTRIAL WASH BAY**

## **MAIN ASSETS**

Introducing a new secure and environmentally friendly industrial wash bay facility. The facility has the necessary Trade Effluent Consent from SEPA and Scottish Water, to discharge the waste through our onsite interceptor. Enabling us to provide a service for the removal and safe disposal of a range of substances such as hydrocarbons, oils, muds and marine growth.

The facility was designed to provide a safe and secure environment for the cleaning of oil and gas equipment, including, but not limited to subsea trees, valves, spools etc.

Onsite we have a wide range of high pressure water jetting equipment and accessories to provide a broad spectrum cleaning capability, including surface preparation, internal retro jetting and hot wash.

The wash bay can accommodate items up to 5 square metres in size.

We provide a fast and efficient turnaround on all high pressure jetting services supported by our trained staff.

The facility has onsite support of forklifts for ease of handling client owned equipment. We can also provide a collection and delivery service.
